CONSTRUCTION CHALLENGE

SUPPLIES
- Lightweight building materials
  - Straws, cotton swabs, paper, sticks
- Heavier building materials
  - Blocks, books, rolls of toilet paper, bricks

LET'S TALK ABOUT IT!
Are the items you are using heavy or light?
What will happen when we try to blow down the house?
Talk about what you see. Why did one house fall down, but not another?

TRY IT OUT!
1. Pretend to be the three little pigs!
2. Experiment with building a house out of the different heavy and light materials that you have on hand.
3. Take turns pretending to be the big bad wolf.
4. Try to blow each of the houses down. Remember to only use your breath!
