MAGIC MILK

SUPPLIES

- Soap
- Food coloring
- Milk
- Plate or other shallow bowl
- Item to stir with
  - cotton swab, spoon, straw

LET'S TALK ABOUT IT!

Before adding the soap, ask yourself what you think will happen?

After the soap is added, ask what you think happened to the colors?

What do you think will happen if we add these two or three colors?

TRY IT OUT!

1. Pour milk into your plate or dish. Add just enough to cover the bottom.
2. Add a few drops of food coloring into the milk. You will want to add more than one color for the experiment.
3. Add a drop of dish soap and watch what happens!
4. Stir the colors together.
