SHAPE SORTING

SUPPLIES

- Tape (painters, masking)
- Household items of different shapes

TRY IT OUT!

1. Use the tape to create shapes on a flat surface, like a table or the floor.
2. Create simple shapes like circles, triangles, and squares.
3. Gather household items to be sorted.
4. Ask your child to match and sort each item by shape.
5. Try more difficult shapes like ovals, diamonds, and stars!

LET'S TALK ABOUT IT!

Before you start, talk about each shape. How many sides does it have?

Talk about each item with your child. What is it? How is it used?

After sorting each item into shapes, count how many you have of each shape. Of which do you have the most—and the fewest?
