SPROUTING SEEDS

SUPPLIES
• Bean seeds
• Paper towel
• Plastic baggie
• Tape

LET'S TALK ABOUT IT!
What are some important things seeds need to sprout and become plants?
Check out different kinds of seeds and talk about what kind of plants they become. Do they become flowers? Do they become fruit or vegetables?

TRY IT OUT!
1. Soak your bean seeds overnight in a cup of water.
2. Dampen a paper towel and fold into the plastic bag.
3. Drain the cup of water and place seeds along one side of the bag, pressing them against the paper towel.
4. Seal the bag with tape and hang on a window with the seeds facing inside for kids to see. Wait 24—48 hours for the seeds to sprout!
